

# PLATFORM TRAILERS

Hardworking solutions  
for demanding freight applications.

 **BENSON**

*Transcraft*<sup>®</sup>

Every load is unique and you need equipment ready to take on the challenge. Wabash National's leadership in commercial transportation equipment extends to our Benson and Transcraft platform trailer brands – all with the same legacy of quality and reliability for which Wabash is known.

The high performance of Benson and Transcraft trailers, along with the industry's most extensive platform dealer network, is the right combination to maximize your freight hauls and keep you on the road. In applications where the lightweight performance of aluminum is a must or those that demand the durability and strength of steel, look to the trusted and proven names of Benson and Transcraft.

"We've always been told by my father and my grandfather that we only buy the best and the most durable, so we've always bought Benson."

Mark, owner-operator  
Zimmerman Truck Lines

"I've had zero complaints since I bought my combo. She looks/hauls great, I highly recommend Transcraft stepdecks."

Robert, owner-operator  
Southwest U.S.A.

### Experience-driven performance.

For over 50 years, Benson® and Transcraft® have defined American-made quality and craftsmanship. Building on this legacy and Wabash National's heritage of innovation, we work to deliver platform trailers that improve your performance, profitability and peace of mind. If you want more from your equipment, get to know the platform trailers our customers have trusted for generations.

Pride in ownership shines through in the rugged, American-made craftsmanship of Benson and Transcraft trailers.

# Aluminum Platform Trailers

No matter the application, fuel economy, corrosion resistance, increased payloads and longer life all add up to maximum operating performance. Benson's smooth trailer ride brings confidence at the wheel and pride in making the delivery.

### Configure your Benson.

- Available in both flat and drop deck
- Load ranges from 52,000 lbs. to 72,000 lbs. in four feet
- Lengths range from 28' to 53'

Automated weld process delivers superior, two-piece, main beam design for no bolts and minimized maintenance.

Lock-Rite™ multi-position tie down system adds flexibility in securing loads.

Innovative crossmember configuration and floor system design eliminates the need for knee braces, adds strength and reduces weight.

1 1/4" thick, extruded hollow core aluminum floor welds to the top flange of the main beam for a stronger beam section and reduced weight.

Optional galvanized components for the utmost in corrosion resistance.

Standard, dual-function LED lighting system enhances highway visibility for improved motorist safety.

One-piece, tubular bumper with extruded grip provides "sure-footed" platform access.

# Steel and Combo Platform Trailers

Strength and durability – built to your specific needs. Transcraft trailers stand up to the most abusive environments. With a wide range of options, there's a Transcraft solution just right for you.

### Configure your Transcraft.

- Available in both flat and drop deck
- Load ranges from 55,000 lbs. to 73,000 lbs. in four feet
- Lengths range from 28' to 53'
- Popular options, such as a forklift mounting kit, are available

Heat treated, 130ksi steel adds strength and reduces weight. The stronger web-to-flange attachment provides long-life performance and eliminates potential corrosion.

Optional Valspar Aquaguard® sealant for the utmost in corrosion resistance.

Interlocking, apitong floor connects with two grade-8 screws at each crossmember. The double shear connection reduces racking and damage.

Standard, dual-function LED lighting system enhances highway visibility for improved motorist safety.

Streamlined siderail design reduces winch strap wear and protects conspicuity tape.

Unique bumper design with vertical protrusion resists corrosion and provides damage protection while docking.

"K" type structural assembly reduces side bending. The P-spindle wheel ends extend wheel life.

Keeping various cargo needs in mind, Benson's low camber design results in optimal interior volume for tarp systems.

Transcraft offers specialty solutions to meet unique application requirements. Our coil haulers provide the lowest available center of gravity for reliable hauling and handling of steel coils.

## Performance runs in the family.

As North America's leading producer of semi-trailers, Wabash National understands that equipment performance, load capacity and uptime are critical to your success.

Our Benson and Transcraft brand trailers are an extension of the passion and innovation inherent in all of our products, ensuring best-in-class performance and peace of mind.
